Recommendation Letter

To APSIPA HQ Travel Grant Selection Committee,

Dear Members of the APSIPA HQ Travel Grant Selection Committee,

I am pleased to recommend William Anthony, an undergraduate student from Indonesia and an author of the accepted paper entitled "An 8-Bit Deep Learning Accelerator for GAN Image Generation on GF180MCU" (Paper ID: 1571326725), for the APSIPA HQ Travel Grant to attend APSIPA ASC 2026.

William is a dedicated student in good academic standing with a strong interest in digital systems, semiconductor technology, and AI hardware acceleration. His research is closely relevant to APSIPA ASC, particularly in the areas of artificial intelligence, machine learning, signal processing, and hardware implementation.

Attending APSIPA ASC 2026 will provide William with an opportunity to present his research, receive feedback from international researchers, participate in technical sessions, and expand his academic network. These experiences will contribute significantly to his research skills and future academic development.

As an undergraduate student with limited financial resources and insufficient external funding, the APSIPA HQ Travel Grant would greatly reduce the financial burden of attending the conference and enable him to fully participate in this valuable international academic forum.

I strongly support William Anthony's application for the APSIPA HQ Travel Grant and believe that this opportunity will provide significant benefits to his academic and research development.

Thank you for your consideration.

Sincerely,

IC DESIGN LABORATORY

Prof. Trio Adiono, S.T., M.T., Ph.D.
Head of Lab Ic Design Microelectronics Center
Institut Teknologi Bandung, Indonesia
